

Inspection Manual Chapter 2800: Inspection Program

Nima Ashkeboussi
Licensing Branch, FSME
OAS Annual Meeting
August 23-26, 2010

Background

- Establishes the policies for the materials inspection program
- Compatibility Category C
- Last revision was in 2005
- Issued July 27, 2010

Revision Drivers

- September 11
- Issuance of orders/legally binding requirements
- GAO sting
- Working group recommendations
- Out of date items, OIG, EDO items

Process for Change

- Original draft sent for comment in RCPD-08-013
- The draft IMC 2800 was sent for Regional comment in October 2009
- Revised draft sent for comment to the Agreement States and the Regions in February 2010 (FSME-10-013)

Summary of Changes

- Defining Risk-Significant Radioactive Material
- Inclusion of the Quantities of Concern Table
- Creation of a new program code for security inspections (secondary)
- Setting security frequency equal to health and safety frequency

Summary of Changes (Cont.)

- Pre-licensing visits for new licensees, existing licensees with significant changes
- Initial security inspections for new licensees with Category 1 or Category 2 quantities prior to license issuance

Future Considerations

- Frequency of security inspections
- Inspections of all authorized locations of use at the same frequency as the parent site
- Telephone inspections
