Web-Based Licensing System

ADELAIDE GIANTELLI
SENIOR PROJECT MANAGER
OFFICE OF NUCLEAR MATERIAL SAFETY AND SAFEGUARDS

AUGUST 17, 2021
... now let’s debunk some myths about WBL.
Myth 1

“... WBL is an NRC system, there isn’t enough Agreement State experience ...”
NRC and the WBL Contractor have 9 years of experience on-boarding Agreement States. As of August 2021:

- **Beginning**: 5
- **In-Progress**: 3
- **On-Board**: 10

**Steps**:
- Ready Test Environment
- Staged in Preproduction
- Agreement State Review
- Perform Corrections and Updates
- "GO" to Production
- Moved to Production
Myth 2

“... it will cost my State Tens of Thousands of dollars to join WBL ...”
WBL is an online system provided to Agreement States at **NO COST** for its development, operation, and maintenance.

- **X**
  - WBL is a cloud based system accessed via web-browser, no additional IT investment is required.

- **✓**
  - WBL on-boarding is a collaborative effort between the WBL contractor, NRC staff, and your staff.
Myth 3

“... it takes years to get on board with WBL ...”
Generally, it takes about 1 year to upload, perform QA, and transition your records/files to the WBL platform.

On-boarding to WBL can take less than a year, the pace is set by your staff’s availability. (Note, new Agreement States have no on-boarding time, we can have WBL up and running for you on your first day.)

During on-boarding, there are times where the WBL contractor stops and requests feedback or approvals from your organization before proceeding.
Myth 4
“... WBL is an NRC system, Agreement States don’t have a say about its design ...”
NRC and Agreement States are partners in the WBL continuous improvement process.

- Enhanced IMPEP support, added IMPEP reviewer role
- Generic license tracking
- Scheduled Data Export
- Inspection module, trip planning

Myth 5
“… WBL can’t handle billing …”
Let’s meet and discuss your billing department needs, the WBL team can provide options.

Your billing department cannot directly connect to the WBL system.

There are several options where data can be exported out of WBL to support your billing needs. We usually can find a mutual solution that works with your needs.
Ongoing and planned WBL improvements

- **Ongoing**
  - Receipt of submittals from external sources

- **Beginning Fall 2021**
  - Inspection module enhancements

- **Beginning Spring 2022**
  - Reciprocity module enhancements
Thank you!
