Management Review Board (MRB) Role

- Provides independent assessment of radiation control program adequacy and compatibility
- MRB members provide input to the MRB Chair on the rating for each performance indicator and proposed recommendations
- MRB Chair is the final decision-making authority and issues the NRC findings to the radiation control program

How to Ensure Successful MRBs?

- Ensure open and collaborative communication
- Anticipate potential questions from MRB members and be ready to answer
- Be prepared to present changes made to the program:
 - As a result of the exit meeting
 - Fact of life changes after the exit
- Provide feedback on your specific IMPEP:
 - What went well?
 - What areas can be improved?
- Continue to learn and implement good practices
