NRC-Sponsored Training Courses

Henry Lynn, M.S., CHP
Sr. Health Physicist
NRC Technical Training Center
Effective?! Efficient?!
Greater flexibility
Reduced time to qualification
Reduced costs (e.g., less travel)
Increased training effectiveness

Mission Accomplishment!
Transformation of Health Physics Courses

Â 2013: In the beginning...
   Fundamental Health Physics (H-122)
Â 2014: OAS assisted in H-122 conversion
Â 2015: H-122 offered as NRC’s first blended learning training course – success!
Â 2016: H-123 converted and rolled into H-122
   (100+ enrolled with 40+ completions – very popular!)
Transformation of Health Physics Courses

Other HP courses converted:
Å 2017: Introductory Health Physics (H-117S)
Å 2018 (April): Internal Dosimetry (H-312S)
Å 2018 (August): MARSAME (H-120S)
Å 2018 (October): MARSSIM (H-121S)
Å 2019 (January): Transportation of RAM (H-308S)
Å 2019 (May): HP Statistics
Å 2019: Decommissioning (H-115S)
HP Instrument Training Videos

A link to the NRC’s YouTube channel has been provided on the NRC’s public website, https://scp.nrc.gov/training.html, for the following videos:

- **HP Instrument Quality Assurance and Quality Control**
  Description: This video provides the basic QA/QC requirements for proper control of HP instruments that regulators use in support of their own programs or for confirmatory surveys at licensee sites.

- **GM Pancake Detectors**
  Description: This video provides extensive information regarding one of the most widely used detectors in the health physics industry.

- **Size of Beam**
  Description: This video describes the issues associated with using an HP instrument in a radiation field that is smaller than the detector associated with the instrument.

- **Many, many more are being produced!**
Thank you!
