Source Collection and Threat Reduction Program (SCATR)

Goal: To collect and commercially dispose of sealed sources no longer in use, which could individually or in aggregate be used maliciously.

Available for most types of sealed sources.

Collection in all US States and Territories.

Sponsored by DOE/National Nuclear Security Administration (NNSA)

Managed by CRCPD

Funding Available for Source Disposals under SCATR

Routine SCATR sources	40%*
Higher Activity sources	Up to 50%*

If higher activity sources are part of the Cesium Irradiator Replacement Program (CIRP) at NNSA and are disposable at a commercial site, they may be eligible for total funding from SCATR funds.

*** Southeast Compact Commission will pay up to an additional 30% for facilities in the Compact states.**

Sources collected since 2007

67,751 Sources

2,506.86 Curies (92.75 TBq)
